The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/572,758	<b>Applicant(s)</b> LAU ET AL.	
	<b>Examiner</b> Jill L. Heitbrink	<b>Art Unit</b> 1791	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 27 December 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bulgrin Pat. No. 5,456,870 (col. 8, lines 59-col. 9, line 12 and col. 20, lines 18-54).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bulgrin Pat. No. 5,456,870 as applied to claims 1 and 3-8 above, and further in view of either Hehl, Pat. No. 5159957 or JP 61-234120.

5. Bulgrin (col. 20, line 59-col. 21, line 2) discloses the cooling by the dissipation of heat to the atmosphere. Hehl and JP'120 each teach controlling the temperature of the cylinder member by a cooling apparatus disposed at the supply port. It would have been obvious to a person of ordinary skill in the art to provide a cooling apparatus

disposed at a supply port in Bulgrin when the amount of cooling by the atmosphere is not sufficient to provide the desired control temperature.

***Response to Arguments***

6. Applicant's arguments filed Dec. 27, 2007 have been fully considered but they are not persuasive.

7. Applicant argues that Bulgrin does not disclose a recording device which stores a recorded target temperature distribution range and indicating an optimal temperature range at each position of the cylinder member. However, Bulgrin has a console screen 28 which is connected to the programmable controller. Figures 1 and 2 clearly show the set point temperatures shown on the console screen. A recording device would have been inherent in the program controller since these set point temperatures are shown with the thermocouple temperatures to show the operating conditions.

8. Applicant argues that Bulgrin does not disclose a control section for adjusting set temperatures of the heaters such that the temperatures fall within the target temperature distribution range. However, the power supplied to the heaters is adjusted so as to obtain a temperature of the set point temperatures, such as the means in col. 24, lines 35-40 of Bulgrin.

9.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1791

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
